## **Course Proposal Submitted to the College of Science Curriculum Committee (COSCC)**

The form above is processed by the Office of the University Registrar. This second page is for the COSCC's reference.

Please complete the applicable portions of this page to clearly communicate what the form above is requesting.

#### FOR ALL COURSES (required)

Course Number and Title: CHEM 212 General Chemistry-II

Date of Departmental Approval: 10/12/2015

### FOR INACTIVATED/REINSTATED COURSES (required if inactivating/reinstating a course)

Reason for Inactivating/Reinstating:

#### FOR MODIFIED COURSES (required if modifying a course)

- Summary of the Modification: Lecture and lab components of GenChem-2 are being decoupled so that students will have the flexibility to repeat only the portion of the course where they want to improve their grade, rather than the entire coupled course. This option is currently available to transfer and summer students from other universities, but not our traditionally matriculating GMU students.
- Text before Modification (title, repeat status, catalog description, etc.):
  - CHEM 212 General Chemistry (4:3:3); Not Repeatable
  - Basic facts and principles of chemistry, including atomic and molecular structure, gas laws, kinetics, equilibrium, electrochemistry, nuclear chemistry, and properties and uses of the more important elements and their compounds.
  - Fulfills Mason Core requirement in natural science (lab).
  - **Prerequisite(s):** CHEM 211. Prerequisite enforced by registration system.
  - **Notes:** Credit will not be given for this course and CHEM 103, 104. Students majoring in science, engineering, or mathematics should choose this course sequence.
  - Hours of Lecture or Seminar per week: 3
  - Hours of Lab or Studio per week: 3
- Text after Modification (title, repeat status, catalog description, etc.):
  - CHEM 212 General Chemistry-I (3:3:0); Repeat Status = N2
  - Fundamental principles of atomic and molecular structure; chemical bonding; basic concepts of chemical reactions and thermochemistry; and properties of gases, liquids, and solids.
  - Fulfills Mason Core requirement in natural science (lecture).
  - Prerequisite(s): CHEM 211, CHEM 213. Prerequisite enforced by registration system.
  - **Notes:** Credit will not be given for this course and CHEM 103, CHEM 104. Students majoring in science, engineering, or mathematics should choose this course sequence.
  - Hours of Lecture or Seminar per week: 3
  - Hours of Lab or Studio per week: 0
- Reason for the Modification:
  - 1. Quite a few of our transfer students come from VCU, Christopher Newport, William & Mary (usually summer session students), JMU, Norfolk State, ODU, UVA, Virginia State and Virginia Tech. The traditional students at these universities experience academic hiccups the same as

- our students, however, the de-coupled nature of their GenChem lecture/lab courses makes it easier for them to repeat the component they failed rather than the entire course. We service many of these students when they return to the Fairfax area for summer session and the bookkeeping is rather interesting.
- 2. We have lab waivers but not lecture waivers, which means that our students are required to repeat lecture and lab if they fail the course. Decoupling the linked courses would allow OUR STUDENTS to repeat the failed component only, i.e. repeat lab only if they pass the lecture portion of the course---the same as is currently done with organic, physical, instrumental analysis, inorganic and biochemistry courses. The mechanism that we currently have in place for transfer students (and summer sessions) allows visiting students to enroll in lecture or lab only, which gives them an unfair advantage over traditional GMU matriculating students.
- 3. Decoupling the lecture and lab components of the course would eliminate the need for lab waivers each semester. Currently, the office staff is bombarded and interrupted with phone calls, non-scheduled office visits and email requests for information regarding eligibility and filing of lab waivers.
- 4. Enrollment snapshots would accurately reflect the numbers as they stand, independently of each other, in the lecture and lab courses. This will eliminate the mismatch that students often encounter when lab waivers have been filed and there are open seats in lab, yet the lecture shows as CLOSED.
- 5. Coding for CHEM 212 will be modified to reflect concurrent/co-requisite enrollment in lecture and lab.

#### **FOR NEW COURSES** (required if creating a new course)

- Reason for the New Course:
- Relationship to Existing Programs:
- Relationship to Existing Courses:
- Semester of Initial Offering:
