Justification	What: Under "Core Courses in Neuroscience", increase the NEUR 327 & 328 requirement from 4 credits to 5 credits. Change the required number of Major Electives from 23 credits to 22 credits.
	Why: NEUR 328 is now a 2 credit course (previously a 1 credit), which necessitates increasing the number of credits in the Neuroscience Core. To avoid increasing the number of total credits in the major, we propose decreasing the number of required major elective credits by 1.
	What: Add NEUR 355: Cross Cultural Studies in Scientific Inquiry to the Major Electives.
	Why: NEUR 355 is a newly approved course that will be taught during the Neuroscience and Technology in Germany study abroad program and we would like to include it as a major elective.

Either course fulfills the writing intensive requirement.

Major Electives

Students should consult with an advisor to choose elective courses. The list below includes pre-approved courses. Elective courses not on the list must be approved by an advisor. Only courses not already taken in the degree will apply as electives, with the exception of seminar and topics courses; a different topic must be addressed in the second instance of a seminar or topics course. Students may apply no more than 6 credits of courses with a grade of 'D' to this requirement. Students intending to pursue a doctorate in neuroscience or a medical degree are advised to take CHEM 313 Organic Chemistry I and CHEM 315 Organic Chemistry Lab I, and consult an advisor for other elective recommendations.
