# <u>Program Approval Form Submitted to the College of Science Curriculum Committee</u> (COSCC)

The form above is processed by the Office of the University Registrar. This second page is for the COSCC's reference.

Please complete the applicable portions of this page to clearly communicate what the form above is requesting.

## Program Title

Accelerated Program: Geography, BS / Geoinformatics and Geospatial Intelligence, MS

Summary:

Create Accelerated Program: Geography, BS / Geoinformatics and Geospatial Intelligence, MS

Reason for the New Program:

To provide an easy pathway between the BS GEOG and the MS-GEOI

**Relationship to Exiting Programs:** 

Both programs exist

**Relationship to Exiting Courses:** 

There are no additional course requirements

**Semester of Initial Offering:** 

Fall 2018

### Approvals:

- Approval from GGS Curriculum Committee on 10/16/2017
- Passed GGS Department Vote on 10/16/2017

### Geography, BS / Geoinformatics and Geospatial Intelligence, MS

#### **Overview**

Offered by the Department of Geography and Geoinformation Sciences (GGS) in the College of Science, this bachelor's/accelerated master's degree program enables highly qualified undergraduates to obtain the Geography, BS and the Geoinformatics and Geospatial Intelligence, MS degrees within an accelerated timeframe. The program strategy enables students to undertake graduate coursework during their final year in the bachelor's degree. This 147 credit program prepares students for professional careers where geoinformation management, geographic analysis, geointelligence analysis and geovisualization are of importance.

Students in this accelerated degree program must fulfill all university requirements for the Geography, BS [hyperlink to be added] and the Geoinformatics and Geospatial Intelligence, MS. While the information below is largely comprehensive, students are strongly encouraged to also review the Bachelor's/Accelerated Master's Degrees section of this catalog.

### **Admission Requirements**

Students with an overall GPA of at least 3.0 may apply for provisional acceptance into this accelerated master's program after completing at least 90 undergraduate credits. Additionally, they must have completed the following courses with a GPA of 3.00 or better: GGS 102 or GGS 121, GGS 103, GGS 110, GGS 300, GGS 310, GGS 311, GGS 412, MATH 113, MATH 114 or IT 207 or STAT250.

Applicants to all graduate programs at Mason must meet the admission standards and application requirements for graduate study as specified in the Admissions section of this catalog. However, this accelerated master's does not require the GRE test scores.

While being undergraduate students, accelerated master's students must complete the two graduate courses indicated on their Accelerated Master's Program Application (obtained from the Office of Academic and Student Affairs) with a minimum grade of 3.00 in each course. They must maintain a minimum GPA of 3.00 in all coursework and in coursework applied to their major.

At the beginning of their final undergraduate semester, they must submit the Bachelor's/Accelerated Master's Transition Form (found on the Office of the University Registrar website). Students must begin their master's program in the semester immediately following the term of undergraduate degree conferral. Students should consult with their faculty advisor in the Department of Geography and Geoinformation Science and the Office of Academic and Student Affairs to obtain further guidance.

#### **Degree Requirements**

Students admitted to this program may start taking graduate courses after completing 90 undergraduate credits. Up to 6 credits of graduate coursework may be applied to both undergraduate degree and the master's degree. If students earn at least a 3.00 in these classes, they are granted advanced standing in the master's program and must then complete 27 additional credits to receive the master's degree. All other master's degree requirements must be met.

#### **Reserve Graduate Credits**

During the bachelor's degree status, students may take up to 6 graduate credits as reserve graduate credit. These credits do not apply to the undergraduate degree, but will reduce the subsequent master's degree credits accordingly (e.g., with 6 credits counted towards undergraduate degree plus the maximum 6 reserve credits, the master's degree can be completed with 21 graduate credits). The ability to take courses for reserve graduate credit is available to all high achieving undergraduates with the permission of the department. To apply the reserved credits to the master's degree, students must request their transfer from the undergraduate degree to the graduate degree via the Bachelor's/Accelerated Master's Transition Form found on the Office of the University Registrar website.
