**Admission Requirements:**

## Admissions

---

University-wide admissions policies can be found in [Undergraduate Admissions Policies](#).  
To apply for this program, please complete the [George Mason University Admissions Application](#).

**Program-Specific Policies:**

## Policies

---

Students must fulfill all [Requirements for Bachelor's Degrees](#), including the [Mason Core](#).  
Important information and departmental policies are listed in the [Department of Biology](#).  
[BIOL 308](#) Foundations of Ecology and Evolution meets the writing intensive requirement for this **major. Transfer students who have transferred in BIOL 308 but did not meet the writing intensive requirement may take MLAB 300 Science Writing to meet the writing intensive requirement.** ~~major.~~  
For policies governing all undergraduate degrees, see [AP.5 Undergraduate Policies](#).

### Important Program Requirements

---

- Students may apply no more than 8 credits of [BIOL 103](#) Introductory Biology I ([Mason Core](#)) or [BIOL 107](#) Intro Biology II Lecture ([Mason Core](#)) and [BIOL 106](#) Introductory Biology II Laboratory ([Mason Core](#)) toward elective credit (or equivalent transfer credit at the 100 to 200-level) if taken before successful completion of [BIOL 213](#) Cell Structure and Function ([Mason Core](#)).
- Biology majors must earn a minimum grade of 'C' in all biology core courses. A grade of 'C' or better must be earned in [BIOL 213](#) Cell Structure and Function ([Mason Core](#)) in order to advance to other core requirements.
- Students may repeat [BIOL 213](#) Cell Structure and Function ([Mason Core](#)) once, but a second time only with permission from the Department of Biology.
- Students may **not** count [BIOL 124](#) Human Anatomy and Physiology and/or [BIOL 125](#) Human Anatomy and Physiology toward any biology major requirement.

- Students who take [BIOL 310](#) Biodiversity may **not** count [BIOL 303](#) Animal Biology and/or [BIOL 304](#) Plant Biology toward any biology major requirement.
- 44 credits must be in biology coursework.
- [BIOL 493](#) Honors Research in Biology, [BIOL 495](#) Directed Studies in Biology, and [BIOL 497](#) Special Problems in Biology do not satisfy the requirements of the BS degree which state that students must complete at least two upper division courses that include a laboratory. The courses do, however, count as non-laboratory electives.

Several optional concentrations are available; details on each can be found in the Requirements tab.

## Teacher Licensure

---

Students majoring in biology who wish to pursue a career teaching secondary school may consider applying for the [Curriculum and Instruction Undergraduate Certificate](#) offered by the [College of Education and Human Development](#) as an option in seeking an initial Virginia teaching license.

Other routes to licensure include the [Biology, BA or BS/Curriculum and Instruction, Accelerated MEd](#) (Secondary Education Biology Concentration) or select traditional Master's programs. Please contact the Undergraduate Advisor in [College of Education and Human Development](#) for more information.

### Degree Requirements:

Students should refer to the [Admissions & Policies](#) tab for specific policies related to this program.

Students must complete their biology coursework and the supporting requirements which follow with a minimum GPA of 2.00.

All students must complete the biology core, chemistry, physics, mathematics, and computer science courses listed below. Students then elect to complete the BS degree either with a concentration or without a concentration.

## Biology Core Courses

<a href="#"><u>GEOL 102</u></a>	Introductory Geology II ( <a href="#"><u>Mason Core</u></a> )

Total Credits 26-33

1Students are encouraged to consult with a biology advisor to determine which option (A, B, or C) best meets their career goals.

2 [CHEM 314](#) Organic Chemistry II does not fulfill this requirement.

## Concentration in Biopsychology (BP)

---

The biopsychology concentration consists of a selection of courses designed to address the needs and interest of students who wish to study biology in more depth while simultaneously exploring psychology and neurobiology. This concentration will help prepare students for the MCAT section related to psychology and provide veterinary students with a background in animal learning/behavior.

## Concentration in Environmental and Conservation Biology (ESCB)

---

This concentration is offered to students seeking a biology degree that focuses on ecology and organismal biology and prepares them for graduate work or employment in environmental and conservation fields, such as natural resources management, fisheries, forestry, water quality management, aquatic and wetland ecology, and conservation biology. The concentration is staffed and supported by the [Department of Environmental Science and Policy](#).

### Plan of Study:

### Honors Information:

## Honors in the Major

---

### Admissions

---

Minimum requirements for invitation:

- GPA in biology courses must be 3.33 or better
- GPA in supporting requirements (math and other science) must be 3.00 or better
- Grade of 'B' or better in [BIOL 213](#) Cell Structure and Function ([Mason Core](#))

Students should apply for admission to the Honors Program during their first or second year at the university. Contact the [Department of Biology](#) for information on applying.

### Retention Requirements

---

Students in honors biology must maintain a biology GPA of 3.33 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

### Requirements to Graduate with Biology Honors

---

Students are required to take 6 to 8 credits in honors courses in BIOL including three semesters of [BIOL 494](#) Honors Seminar in Biology or two semesters of [BIOL 494](#) Honors Seminar in Biology and one semester of [BIOL 493](#) Honors Research in Biology. [BIOL 498](#) Research Seminar may count towards one of the semester requirements of [BIOL 494](#) Honors Seminar in Biology. The GPA requirements are as follows:

- Minimum 3.33 GPA in honors biology courses
- Minimum 3.33 GPA in biology requirements
- Minimum 3.00 GPA in supporting requirements
- Minimum 3.00 GPA overall

## Additional Program Information

---

*This information is required by the Office of Accreditation and Program Integrity.*

**Courses offered via distance (if applicable):**

**What is the primary delivery format for the program?**  
Face-to-Face Only

**Does any portion of this program occur off-campus?**

No

**Are you working with a vendor / other collaborators to offer your program?**

No

**Related Departments**

**Could this program prepare students for any type of professional licensure, in Virginia or elsewhere?**

No

**Are you adding or removing a licensure component?**

No

## Additional SCHEV & SACSCOC Information

---

**Are you changing the total number of credits required for this program?**

**Are you changing the delivery format in any way (e.g adding an online option)?**

**Are you adding/removing a licensure option which was approved by SCHEV?**

**Will any portion of this program be offered at an off-campus location?**

**Are you adding significant new content areas to the program?**

Will this program change affect any specialized accreditation?

### Green Leaf Program Designation
