Catalog Description: Immunology, virology, and microbiology of vaccines. Classical and new generation vaccine practices and strategies. Current and future vaccines.

Justification: This is a lecture course and there is no reason for the laboratory requirement from microbiology (BIOL306) is needed for the students. Also students who have taken the nursing microbiology (BIOL246) or transferred this course in (BIOL246 T) should be able to take BIOL420 without us needing to do a prerequisite override.

Does this course cover material which crosses into another department? No
