Catalog Description: An introduction to the fundamental nature of viruses, their classification, morphology, chemistry and their role in human disease.

Justification: We have students who have transferred in microbiology as BIOL 246 but are qualified to take virology. Also there are students who have taken BIOL246 (Non biology majors) who want to take virology and we are fine with them taking the class. Eliminates the need for overrides.

Does this course cover material which crosses into another department? No
