Catalog Description: Continuation of general biochemistry, focusing on secondary metabolism, cell signaling, and processes of replication, transcription, and translation. Emphasizes important biochemistry research topics; much material drawn from current biochemical literature.

Justification: Updating the course to include the repeat limit (n=3) as well as hard code BIOL 483 as a prerequisite. BIOL 483 is equivalent to the existing CHEM 463 prerequisite.

Does this course cover material which crosses into another department? No
