Registrar/IRR Use Only – Concentration CIP Code	
College/School:	College of Science
Department / Academic Unit:	Biology
Jointly Owned Program?	No
Justification	A biology professor had a class in which she asked for illustrations for books they were writing and the class immediately filled. This new concentration gives students the opportunity to marry biology and art.
Total Credits Required:	Total credits: minimum 120
Registrar's Office Use	Only - Program Code:
	SC-BA-BIOL
Registrar/IRR Use Only – Program CIP Code	
Admission Requirements:	
Admissions	
	ions policies can be found in the <u>Undergraduate Admissions Policies</u> section of this catalog.
o apply for this progra	m, please complete the <u>George Mason University Admissions Application</u> .
Program-Specific Policies:	
Policies	

Concentration(s):

Students must fulfill all Requirements for Bachelor's Degrees, including the Mason Core. Students in this bachelor's program must also complete the additional College Requirements for the BA Degree (see Requirements).

The writing intensive requirement is fulfilled by <u>BIOL 308</u> Foundations of Ecology and Evolution. Transfer students who have transferred in <u>BIOL 308</u> Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take <u>MLAB 300</u> Science Writing to meet the writing intensive requirement.

Important information and departmental policies are listed with the <u>Department of Biology</u>.

For policies governing all undergraduate programs, see AP.5 Undergraduate Policies.

Important Program Requirements

Students must complete the degree requirements with:

- A minimum GPA of 2.00 in the BIOL courses listed in the degree program
- A minimum GPA of 2.00 in the supporting courses listed in the degree program

Additionally:

- Students may apply no more than 4 credits of <u>BIOL 103</u> Introductory Biology I (<u>Mason Core</u>) or <u>BIOL 107</u> Intro Biology II Lecture (<u>Mason Core</u>) and <u>BIOL 106</u> Introductory Biology II Laboratory (<u>Mason Core</u>) toward elective credit (or equivalent transfer credit at the 100 to 200-level) if taken before the successful completion of <u>BIOL 213</u> Cell Structure and Function (<u>Mason Core</u>).
- Biology majors must earn a minimum grade of 'C' in all of the biology core courses. A grade of 'C' or better must be earned in <u>BIOL 213</u> Cell Structure and Function (<u>Mason Core</u>) in order to advance to other core requirements.
- Students may repeat <u>BIOL 213</u> Cell Structure and Function (<u>Mason Core</u>) once, but a second time only with permission of the <u>Department of Biology</u>.
- Students may **not** count <u>BIOL 124</u> Human Anatomy and Physiology and/or <u>BIOL 125</u> Human Anatomy and Physiology toward any biology major requirement.
- Students who take <u>BIOL 300</u> BioDiversity may **not** count <u>BIOL 303</u> Animal Biology and/or <u>BIOL 304</u> Plant Biology toward any biology major requirement.
- <u>BIOL 308</u> Foundations of Ecology and Evolution meets the writing intensive requirement for this major. Transfer students who have transferred in <u>BIOL 308</u> Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take <u>MLAB 300</u> Science Writing to meet the writing intensive requirement.
- <u>BIOL 493</u> Honors Research in Biology, <u>BIOL 495</u> Directed Studies in Biology, and <u>BIOL 497</u> Special Problems in Biology do not satisfy the requirements of the BA degree which state that students must complete at least one upper division course that includes a laboratory. The courses do, however, count as non-laboratory electives. The total limit for <u>BIOL 493</u> Honors Research in Biology, <u>BIOL 495</u> Directed Studies in Biology and <u>BIOL 497</u> Special Problems in Biology combined is 3 credits toward 32 credits for the BA.

Teacher Licensure

Students majoring in biology who wish to pursue a career teaching secondary school may consider applying for the Curriculum and Instruction Undergraduate

Certificate offered by the College of Education and Human Development as an option in seeking an initial Virginia teaching license.

Other routes to licensure include the <u>Biology, BA or BS/Curriculum and Instruction, Accelerated MEd</u> (Secondary Education Biology Concentration) or select traditional Master's programs. Please contact the undergraduate advisor in the <u>College of Education and Human Development</u> for more information.

Degree Requirements:

Students should refer to the <u>Admissions & Policies</u> tab for specific policies related to this program.

Biology Core Courses

	Course List	
Code	Title	Credits
BIOL 213	Cell Structure and Function (Mason Core)	4
BIOL 214	Biostatistics for Biology Majors	4
BIOL 300	BioDiversity	4
BIOL 308	Foundations of Ecology and Evolution 1	5
BIOL 311	General Genetics	4
Total Credits		21

1Fulfills the writing intensive requirement.

Transfer students who have transferred in <u>BIOL 308</u> Foundations of Ecology and Evolution but did not meet the writing intensive requirement may take <u>MLAB 300</u> Science Writing to meet the writing intensive requirement.

Retroactive
Requirement
Updates:

Plan of Study:

Honors

Information:

Honors in the Major

Admissions

Minimum requirements for invitation:

- GPA in biology courses must be 3.33 or better
- GPA in supporting requirements (math and other science) must be 3.00 or better
- Grade of 'B' or better in <u>BIOL 213</u> Cell Structure and Function (<u>Mason Core</u>)

Students should apply for admission to the Honors Program during their first or second year at the university. Contact the Department of Biology for information on applying.

Retention Requirements

Students in honors biology must maintain a biology GPA of 3.33 or better and a supporting GPA of 3.00 or better from the time they have accumulated 30 hours and thereafter. Students who fall below this standard will be given a one semester probationary period in which to bring their GPA back up to the minimum standard.

Requirements to Graduate with Biology Honors

Students are required to take 6 to 8 credits in honors courses in BIOL including three semesters of <u>BIOL 494</u> Honors Seminar in Biology or two semesters of <u>BIOL 494</u> Honors Seminar in Biology and one semester of <u>BIOL 493</u> Honors Research in Biology. <u>BIOL 498</u> Research Seminar may count toward one of the semester requirements of <u>BIOL 494</u> Honors Seminar in Biology. The GPA requirements are as follows:

- Minimum 3.33 GPA in honors biology courses
- Minimum 3.33 GPA in biology requirements
- Minimum 3.00 GPA in supporting requirements
- Minimum 3.00 GPA overall

Additional Program Information

This information is required by the Office of Accreditation and Program Integrity.

Courses offered via distance (if applicable):	
What is the primary delivery format for the program?	Face-to-Face Only
Does any portion of t	his program occur off-campus?
	No
Are you working with	n a vendor / other collaborators to offer your program? No
Related Departments	
Could this program p Virginia or elsewhere	repare students for any type of professional licensure, in ?
	No
Are you adding or ren	moving a licensure component?
	No
Additional SCHE	V & SACSCOC Information
Are you changing the	total number of credits required for this program?
Are you changing the	delivery format in any way (e.g adding an online option)?
Are you adding/remo	ving a licensure option which was approved by SCHEV?
Will any portion of th	is program be offered at an off-campus location?

Are you adding significant new content areas to the program?

Will this program change affect any specialized accreditation?

Green Leaf Program Designation

Is this a Green Leaf N program?

Does this program cover material which crosses into another department?

No
