Catalog Description: Sustainability lies at the intersection of the environment, society and economics. This course explores the **concepts concepts, applications, and tools for analysis and decision making in support of sustainable development at different geographical scales (local, national and international). environmentally sustainable, socially responsible and economically prosperous development. We examine the applications, indicators, measurement tools of sustainable development for analysis and decision making in support of environmentally sustainable development from a geographic perspective.** Case studies and problem-solving exercises will **be used to** stimulate learning and provide practical experience in addressing sustainable development issues.

Justification: Updating the course title and description to match current practice.

Does this course cover material which crosses into another department? No
