Catalog Description:

Sustainability lies at the intersection of the environment, society and economics. This course explores the **concepts** ~~concepts, applications, and tools for analysis and decision making in support~~ of **sustainable development at different geographical scales (local, national and international). environmentally sustainable, socially responsible and economically prosperous development.** ~~We examine the applications, indicators, measurement tools of sustainable development for analysis and decision making in support of environmentally sustainable development from a geographic perspective.~~ Case studies and problem-solving exercises will **be used to** stimulate learning and provide practical experience in addressing sustainable development issues.

Justification:

Updating the course title and description to match current practice.

Does this course cover material which crosses into another department?

No
