Admissions

University-wide admissions policies can be found in the <u>Undergraduate Admissions Policies</u> section of this catalog. To apply for this program, please complete the <u>George Mason University Admissions Application</u>.

Program-Specific Policies:

Policies

Students must fulfill all <u>Requirements for Bachelor's Degrees</u> including the <u>Mason Core</u>. The intensive writing requirement is fulfilled by taking <u>PHYS 407</u> Senior Laboratory in Modern Physics (Mason Core), <u>PHYS 410</u> Computational

Physics Capstone (Mason Core), or PHYS 407 Senior Laboratory in Modern Physics (Mason Core) or <u>ASTR 402</u> RS: Methods of Observational Astronomy (Mason Core), which are also capstone courses for the major.

For policies governing all undergraduate programs, see <u>AP.5 Undergraduate Policies</u>.

Double Majors

Students considering a double major with physics should discuss this option with the respective undergraduate coordinators. Note that at least 18 credits used to fulfill the Physics, BS cannot be used to fulfill another major or minor. Some course substitutions are allowed for double majors, but these should be discussed with a physics advisor in advance.

Alternative Introductory Sequence

https://workingcatalog.gmu.edu/courseleaf/courseleaf.cgi?page=/programadmin/564/index.... 8/26/2019

Normally, students who intend to major in physics should take the physics introductory sequence:
