School(s):

Catalog

Description:

The chemical basis of life, the structure and function of the cell, Mendelian and human genetics, and the major animal phyla are presented. Notes: Not available to students who have taken BIOL 103 or the equivalent.

Justification:

BIOL105 is only the lab for BIOL103. It does not have any lecture component so it is not equivalent to BIOL103. (Removal equivalency to BIOL103)

Would only need to take BIOL105 if you transferred in BIOL103T (BIOL 103 without the lab)

Does this course cover material which crosses into another department? No
