Catalog

Description:

This course provides the scientific principles of crime scene investigations by applying the basic knowledge of proper documentation, collection and preservation of physical evidence. Proper crime scene protocols and evidence processing techniques will be performed in areas such as, forensic photography, sketching, blood stain pattern analysis, trajectory, skeletal remains, and fingerprinting.

Justification:

FRSC 302 was added as a required prerequisite and 90 credits was added as a recommended prerequisite to help ensure students are fully prepared for this course which covers advanced topics and hands-on exercises.

Does this course cover material which crosses into another department? No
