**School(s):****Catalog****Description:**

Management of geospatial data by means of a database system. Communication of geospatial data over the Internet using browser-based interfaces.

**Justification:**

What:

Add equivalency to undergraduate offering (GGG 462), which is consistently crosslisted

Why:

There are several reasons why GGS is aligning upper level undergraduate courses with graduate courses. Many are getting new course title and descriptions, but for GGS 692 the edits are to create an undergraduate equivalency. The alignment also makes it easier to crosslist the undergraduate/graduate courses, allowing GGS to better deploy faculty teaching assignments. The department is also expecting more BAM students, and these alignments make logistics for BAM students and advisors easier by establishing consistent graduate level equivalencies to undergraduate courses.

**Does this course cover material which crosses into another department?** No
