Catalog

Description:

Advanced seminar on a selected topic in neuroscience. Includes in depth reading and discussion of current research in human and nonhuman animals, with an emphasis on critical evaluation. Notes: Course may be repeated if selected topic is different.

Justification:

NEUR 411 is the technical writing course for the BS in Neuroscience and should be one of the student's last courses. Recommended pre-requisites are not preventing lower level (first/second year) students from enrolling and instructor has unprepared students in course. Adding required pre-requisite of ENGH 302 and at least one core neuroscience course will ensure students are better prepared to succeed.

Does this course cover material which crosses into another department? No
