Description:

General consideration of animal function emphasizing common life problems and methods for solving them. Topics include intercellular communication (nervous and endocrine), metabolism, water and solute balance, and cardiovascular and respiratory physiology.

Justification:

BIOL 326 will likely be crosslisted with EVPP 326 (a newly approved course) some semesters; as such, we are updating the prerequisites to match EVPP 326's as they are appropriate for BIOL 326: BIOL 213 or U213, or EVPP 210, or permission of instructor.

**Does this course cover material which
